

LINDA D. DOGBE, MSc, TOGAF

Enterprise Architect · Digital Transformation Leader · Founder, Qavaa Innovate · Author, the AXIS Framework
English · Français · Español

Profile

Linda Dogbe is a certified Enterprise Architect and digital transformation leader who has spent fifteen years building the systems that move capital. She is the author of the AXIS enterprise architecture framework, the founder of a minority woman-owned technology-education nonprofit spanning the United States and West Africa, and the author of *From Invisible to Investable*, the digital credit architecture now before Africa's financial leadership. She brings the same discipline, shared standards, measurable maturity, and clear governance, to every institution she advises. Her conviction is a simple one: technology should open doors, and the people too often left outside it, women, girls, and small entrepreneurs, belong at the center of how the digital economy is built.
